SECTION SF 30 BLOCK 14 CONTINUATION PAGE

The following items are applicable to this modification:

This amendment Two (0002) is issued to address the questions asked at the Site Visit on 10 April 2003.
The following questions and answers are incorporated in this solicitation.

Big Creek Process Waste Disposal Site Visit – April 10, 2003 @ 1:00 pm Questions and Responses:

Question	Response
1. Is the drum contents considered a DOT Hazardous Substance?	Yes – based on the sample results provided and the DOT regs.
2. Will the substance need to be handled as a DOT Hazardous Substance?	Yes
3. Will someone be onsite to sign the transport / Bill of Lading papers?	The contractor will be responsible for signing the DOT bill of lading.
4. Has subtitle D facilities been contacted about whether they would accept this waste?	Yes, at least two have said they would accept this waste.
5. What are the cleanup requirements for the shed and the parking area?	Visually clean. Pictures will be taken before and after site work to assist in this determination. Anything brought onsite must be removed. The site must be restored to the condition it was prior to the drum removal.
6. Is power available?	The contractor will need to provide power.
7. Is potable water available?	Options available: 1) Bring your own, 2) obtain a permit to use water from the creek, or 3) contract a local provider.
8. What is the pay structure?	Payment will be made in accordance with the prompt payment act. Invoices may be submitted no more often than once per month and are to be based on unit prices provided in the contractor bid.
9. Do the dust levels need to be controlled?	Yes, dust suppression will be required if airborne dust becomes visible.

10. How will the quantity of drums be verified?	The contractor and the USACE onsite representative will count drums before they are removed from the snow shed. A consensus between the contractor and the USACE rep will be reached and recorded.
11. Between selection of contractor and NTP, will any work be expected prior to NTP (i.e.: the work plan)?	No work will be required from the contractor prior to NTP.
12. How is water from project activities (decon, pressure washing, dust suppression, etc) to be handled?	Water can be collected and then transported to the Bunker Hill Central Treatment Plant lined pond. If alternative appropriate disposal options are preferred, the contractor will need to make those arrangements.
13. Is site security needed?	The contractor will need to provide their own security to protect the work area and their equipment.
14. Will alternative proposals be considered?	Yes – remember that the deciding criterion is “lowest qualified bid”.
15. Is the road a county road? If so, will DOT regulations need to be met?	Yes – DOT regs will be applicable when the material (treated or untreated) is loaded and ready for transport to the TSD.
16. Will a county permit or notification be needed to use the road?	The EPA and ID DEQ do not anticipate that a permit will be required, however, if one is required, the EPA and ID DEQ will obtain it at their expense. The contractor must, at a minimum, designate a person to act as flagger to direct local traffic during project hours.
17. Can the contractor contact Sunshine Mines regarding this project?	No – please address all comments, questions, and concerns to the USACE POC, Elizabeth Chien, 206-764-6718.
18. Will the attendees (sign in sheet) of the site visit be posted?	No

Due Date Remains 18 April 2003, 10:00 AM Local Time

All other terms and conditions remain unchanged.

Offers must acknowledge this amendment by date and number.
